SOLENOID OPERATED DIRECTIONAL VALVE
SWH-G02 SERIES

FEATURES

- Armature operates in oil system. Impact is cushioned, noise is reduced, solenoid life is increased.
- Wet armature solenoid eliminates push pin seal, therefore no seal wear, drop or leakage for longer valve life.
- Molded coils for maximum insulating properties, which is impervious to moisture and dirt.
- Plug-in solenoid, for ease of maintenance.
- All spools and bodies are interchangeable, simplifying maintenance.
- Indicating signal lights are standard.
- High pressure, high flow rating, provides low pressure drop, with maximum performance.
- Specially designed, balanced spool allows proper shifting force, for maximum reliability and long life.
- Viton seal kits are available for fire-resistance fluids.

TECHNICAL DATA:

- Solenoid can be used within -10% to +10% of the rated voltage of the coil.
- Withstand voltage 1500 v/sec.
- Insulation resistance over 100mΩ
- A momentary signal of approx. 0.1 second is required for shifting action.

ACCESSORIES:

- Mounting bolt kits are supplied with valve socket head cap screws M5x45L 4 pieces (#10-24 UNC x 13/4" L) for tightening torque 50-70 kgf – cm (43.3-60 lbs-in).
- O-ring AS568-0124 pieces.

TEST CIRCUIT

LS OPTION

Electrical Surge Control Model

LS OPTION

Valve model: SWH-G02-***-D ** - ** -LS

FEATURES

- Suppresses the surge voltage.
- Eliminates sparks between relay contacts.
- Extends the life of the relay contact.

EFFECTS

- Improves the reliability of the control relay.
- Extends the life of conventional relays.
- Can be operated with a miniature relay.
- The RAC rectifier built-in DC model eliminate sparks at the control relay contact. It can be directly operated with a PLC (programmable logic controller).

SOLENOID OPERATED DIRECTIONAL VALVE SWH-G02 SHOCKLESS TYPE

FEATURES

- Armature operates in oil system. Impact is cushioned, noise is reduced, solenoid life is increased.
- Wet armature solenoid eliminates push pin seal, therefore no seal wear, drop or leakage for longer valve life.
- Molded coils for maximum insulating properties, which is impervious to moisture and dirt.
- Plug-in solenoid, for ease of maintenance.
- All spools and bodies are interchangeable, simplifying maintenance.
- Indicating signal lights are standard.
- High pressure, high flow rating, provides low pressure drop, with maximum performance.
- Specially designed, balanced spool allows proper shifting force, for maximum reliability and long life.
- Hydraulic shock caused by abrupt change in the flow condition at flow cut off is minimized by a specially machines spool.
- Specifically designed to control the shock or "bang" in hydraulic systems.
- Minimizes the effect of pressure spikes or instantaneous high flow rates common in many hydraulic systems.
- A.C coil design with flexible timing characteristics when compared to rectified D.C. coil technology.

HOW TO ORDER

	D24	DC24V		21.6-26.4	1.1	1.1	

TECHNICAL DATA:

- Solenoid can be used within -10% to + 10% of the rated voltage of the coil.
- Withstand voltage 1500 v/sec.
- Insulation resistance over 100MΩ.
- A momentary signal of approx. 0.1-second is required for shifting action.

ACCESSORIES:

- Mounting bolt kits are supplied with valve socket head cap screws M5 x 45L 4 pieces (#10-24UNC x 1 3/4") for tightening torque 50-70 kgf-cm. (43.3-60.6 lbs-in)
- O-ring AS568-012 4 pieces.

SOLENOID OPERATED DIRECTIONAL VALVE
SWH-G03 SERIES

FEATURES

- The indicating lights are the standard equipment.
- Coil screws are especially designed to prevent shocks.
- Electrical connections are with joint box type and hirschmann din type plug-in connector.
- Join box is of waterproof and dust-resistance.
- The space for electrical connections is large enough for connection layout.
- Electrical connection points are aligned with the axial direction to be compatible with modular system.
- For ease of installation and repair, the valve mounting screws are on the outside of the body.
- To sustain high pressure up to 315 kgf/cm² (4500 psi), allows for large flow rates up to 120 lpm (32 gpm).
- The ideal design of flow passages will minimize the pressure drop.
- The 4-way 4-land constructure design is applied, for reducing the flow force and system surging pressure.
- To sustain high back pressure up to 160 kgf/cm² (2350 psi)
- Manufactured with unified specifications allows for parts and accessories interchangeably.
- Viton seal kits are available for five-resistance fluids.

LS OPTION

Electrical Surge Control Model

LS OPTION

Valve model: SWH-G03-***-D***-LS

FEATURES

- Suppresses the surge voltage.
- Eliminates sparks between relay contacts.
- Extends the life of the relay contact.

Effects

- Improves the reliability of the control relay.
- Extends the life of conventional relays.
- Can be operated with a miniature relay.
- The RAC rectifier built-in DC model eliminate sparks at the control relay contact. It can be directly operated with a PLC (programmable logic controller).

Electrical surge waveform standard DC Solenoid.

Electrical surge controlled DC solenoid.

SOLENOID OPERATED DIRECTIONAL VALVE SWH-G03 SHOCKLESS TYPE

FEATURES

- The indicating lights are the standard equipment.
- Coil screws are especially designed to prevent shocks.
- Electrical connections are with joint box type and hirschmann DIN type plug-in connector.
- Join box is of waterproof and dust-resistance.
- The space for electrical connections is large enough for connection layout.
- Electrical connection points are aligned with the axial direction to be compatible with modular system.
- For ease of installation and repair the valve mounting screws are on the outside of the body.
- To sustain high pressure up to 210 kgf/cm² (3000 PSI), allows for large flow rates up to 80 LPM (21 GPM).
- The ideal design of flow passages will minimize the pressure drop.
- The 4-WAY 4-LAND constructure design is applied, for reducing the flow force and system surging pressure.
- To sustain high back pressure up to 160 kgf/cm² (2350 PSI)
- Manufactured with unified specifications allows for parts and accessories interchangeably.
- Specifically designed to control the shock or “bang” in hydraulic systems.
- Minimizes the effect of pressure peaks or instantaneous high flow rates common in many hydraulic systems.
- A.C. coil design with flexible timing characteristics when compared to rectified D.C coil technology.

HOW TO ORDER

SWH - G03 - C2 - R220 - 10 - M

SOLENOID OPERATED DIRECTIONAL VALVE
SWH-G03 SHOCKLESS TYPE

SPECIFICATIONS

MAXIMUM OPERATING PRESSURE	210 kgf/cm ² (3000 PSI)
MAXIMUM FLOW CAPACITY	80 LPM (21 GPM)
MAXIMUM TANK LINE BACK PRESSURE	160 kgf/cm ² (2350 PSI)
MAXIMUM FREQUENCIES OF OPERATION	240 CPM
RECOMMENDED FILTRATION	25 Micron
HYDRAULIC FLUIDS	Mineral oil, recommendation temperature 0-55°C Max. Temperature range – 25°C~ 90°C Viscosity 10-400 cSt

REMARK: Installation dimensions see page23, 24

SOLENOID RATINGS

ELECTRI SOURCE	COIL TYPE	VOLTAGE (V)			CURRENT & POWER AT RATED VOLTAGE		
		SOURCE RATED	Hz	RANGE	IN-RUSH CURRENT (A)	HOLDING CURRENT (A)	WATTAGE

	D24	DC24V		21.6-26.4	1.33	1.33	32

TECHNICAL DATA:

- Solenoid can be used within – 10% to + 10% of the rated voltage of the coil.
- Withstand voltage 1500 v/sec.
- Insulation resistance over 100MΩ

ACCESSORIES:

- Mounting bolt kits are supplied with valve socket head cap screws M6 x 35L 4 pieces(1/4" – 20UNC x 1 3/8") for tightening torque 120-150 kgf-cm. (104-130 lbs-in)
- O-ring AS568-014. 5pieces.

**SOLENOID CONTROLLED
PILOT OPERATED DIRECTIONAL VALVE**
SW-G04 SERIES

FEATURES

- Armature operates in system oil. Impact is decreased with cushion added, making noise lowered & solenoid life prolonged.
- Wet armature solenoid eliminates push pin seal, therefore no seal wear, drop or leakage for longer valve life.
- Molded coil gives maximum insulating properties. It is protected by a special resin and is impervious to moisture and dirt for ease of maintenance.
- Plug-in solenoid, easy to change coil.
- Change of pilot and drain can be easily accomplished by plugging or un-plugging.
- Spool is designed to avoid creating jet flow or turbulence under high pressure and large flow operation.

TECHNICAL DATA:

- Solenoid can be used within – 10% to + 10% of the rated voltage of the coil.
- Withstand voltage 1500 v/sec.
- Insulation resistance over 100MΩ.
- A momentary signal of approx 0.1 second is required for shifting action.
- Pilot pressure of internally drained valves must always exceed tank port pressure by a minimum of 8.0 kgf/cm² (113 PSI) Valve must be externally drained if there is a possibility of tank line persuader surges overcoming this differential.
- Open center spools C3, C5, C6, C60 must be externally drained.

ACCESSORIES:

- Mounting bolt kits are supplied with valve socket head cap screws
M6 x 45 L 2 pieces (1/4" – 20 UNC – 2B x 1 3/4"L) for tightening torque 120-150 kgf-cm.(104-130 lbs-in).
M10 x 50 L 4 pieces (3/8" – 16 UNC-2B x 2"L) for tightening torque 580-720 kgf-cm.(502-624 lbs-in).
- O-ring P22A 90° 4 pieces, P9 90° 2 pieces.

TECHNICAL DATA:

- Solenoid can be used within – 10% to + 10% of the rated voltage of the coil.
- Withstand voltage 1500 v/sec.
- Insulation resistance over 100MΩ.
- A momentary signal of approx. 0.1 second is required for shifting action.
- Pilot pressure of internally drained valves must always exceed tank port pressure by a minimum of 3.5 kgf/cm² (50 PSI) Valve must be externally drained if there is a possibility of tank line pressure surges overcoming this differential.
- Open center spools C3, C5, C6, C60 must be externally drained.

ACCESSORIES:

- Mounting bolt kits are supplied with valve socket head cap screws
M12x60L 6 pieces (1/2"-13UNC-2Bx2 3/8" L) for tightening torque 1000 - 1230 kgf-cm. (886 - 1066 lbs-in).
- O-ring P28 90° 4 pieces, P21 90° 2 pieces.
